Digital Vehicle Insurance Verification

PayIt

Enable motorists to quickly prove compliance

Traditional methods of insurance verification rely on unreliable, outdated data. PayIt verifies policies in real time when a motorist registers or renews a vehicle, and continuously monitors for changes or lapses. Automated digital notifications drive compliance while eliminating the need for manual verification checks and mailed correspondence.

Make it easy for motorists to prove they're insured

1 Motorists securely verify with their carrier login credentials at registration or renewal.

2 Policy details, payment status, drivers, and vehicles on the policy are instantly verified.

3 Continuous monitoring checks for policy lapses or changes and automatically notifies non-compliant motorists.

Shift the compliance burden from your staff to motorists

- Eliminate manual reviews and mailed notifications
- Reduce the frequency and burden of administrative hearings
- Eliminate outdated or falsified paper proof documents
- Monitor carrier and policy changes, as well as cancellations/lapses
- Keep a closer eye on high-risk motorist pools

✓ Take the guesswork out of compliance

Works with 99% of carriers and verifies policies only from authorized providers.

✓ Verify coverage online or at the counter

The digital workflow integrates into PayIt's experience and takes the guesswork out of in-person interactions.

✓ Give other agencies visibility

Spot-check policies during traffic stops, incorporate verifications into hearing proceedings, and securely collect fees and fines in one application.
