

# DMV

A streamlined platform for digital DMV services and payments

Make interacting with the DMV easy for your residents. With PayIt's configurable platform, you can digitize driver and vehicle services, such as driver's license and renewals, vehicle registration, ordering custom license plates, and more!

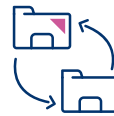

## PayIt delivers results

PayIt has helped agencies get remarkable results like these:

- Reduce wait times and optimize foot traffic
- Deliver robust reporting and analytics that inform product enhancements
- Improve communication with motorists and overall resident satisfaction
- Commit to accessibility including ADA and WCAG 2.0 AA compliance
- Connect to any system of record and integrates with existing finance systems

## PayIt helps residents and motorists:

- Pay for vehicle registration, renewals, titling, and tickets
- Renew driver's licenses
- Access receipts and official documents such as vehicle registration and temporary driving certificates online
- Link all vehicles for one-stop household management

### Data Integration

PayIt connects to existing back-office systems of record through API or flat file integration.

### GovWallet

Residents store payment information, manage accounts, and view receipts in one place.

### ProSight Administrative Portal

Agencies can access real time transaction data and robust reporting to identify and capitalize on transaction trends and user behavior.
